Skills

React, Next.js, Tailwind CSS, TypeScript, React Router, Redux Toolkit, Zustand

Projects

Bite Byte Recipe

A simple web application built to practice front-end development. The application allows users to browse, search, and filter recipes.

Features

- Browse Recipes: Display a list of recipes with details like name, image, and ingredients.
- Search: Search for recipes by name or other attributes.
- Filter Recipes: Filter recipes based on various categories such as difficulty, cuisine, or meal type.
- Responsive Design: The app is fully responsive and works across devices.
- State Management: Zustand is used for state management.

Technologies Used

- Frontend: React, TypeScript, Tailwind CSS
- State Management: Zustand
- API: Dummy JSON (for fetching recipe data)

Max-Martel

Max Martel Ali - Practice Project This is a practice project built to enhance frontend development skills using modern web technologies.

Features

- Responsive and modern UI design
- Smooth navigation and transitions
- Placeholder content for a dental clinic website

Technologies Used

- Next.js - React framework for server-side rendering and static site generation
- Tailwind CSS - Utility-first CSS framework for styling
- Vercel - Deployment platform for hosting the project

Demo - <https://max-martel.vercel.app>

GitHub - <https://github.com/mohammedAliYusuf09/max-martel>

Portfolio

This is my personal portfolio website showcasing my skills, projects, and experience as a front-end web developer.

Features

- Fully responsive design
- Interactive UI with smooth animations
- Showcase of projects with details and links
- Contact section for potential clients or employers
- SEO optimized for better reach

Technologies Used

- Next.js - React framework for server-side rendering and static site generation
- Tailwind CSS - Utility-first CSS framework for styling
- Vercel - Deployment platform for hosting the project
